Advanced Materials

Supply of advanced alloys for nuclear& energy; clad plates and transition joints

Prezentare

BSW Metals is a Romanian supplier of advanced materials for nuclear, energy and industrial sectors, specializing in nickel and titanium alloys for critical applications.

The company supplies certified semi-finished products (bars, pipes and plates) and provides sourcing and supply chain support.

As the exclusive representative in Eastern Europe of Shockwave Metalworking Technologies (SMT)B.V., BSW Metals offers clad plates and transition joints solutions for complex engineering projects.
