Prezentare

Tejas Development este o companie românească de dezvoltare tehnologică și de business, construită în jurul conceptului de **Smart Technology Hub**. Pornind de la o experiență extinsă în electronică, apărare și securitate și IT&C, Tejas sprijină **proiecte inovatoare bazate pe tehnologie**, de la identificarea oportunităților și definirea conceptului până la selectarea partenerilor, proiectarea soluției, planificarea implementării și managementul de proiect. Compania dezvoltă **ecosisteme multidisciplinare** care conectează industria, furnizorii de tehnologie, integratorii, cercetarea, mediul academic și sectorul public. Tejas urmărește **tehnologiile emergente** și **dezvoltă parteneriate** cu furnizori internaționali, cu interes pentru infrastructuri critice, transformare digitală, securitate cibernetică, tehnologii dual-use și tranziția către economia verde. Ca **membru ROMATOM, Tejas** contribuie cu **scouting tehnologic, dezvoltarea inovării, construirea de parteneriate și management de proiect** în ecosistemul nuclear și energetic din România.

Tejas Development is a Romanian business and technology development company built around the concept of a **Smart Technology Hub**. Drawing on extensive experience in electronics, defence and security, and IT&C, Tejas supports **innovative, technology-driven projects** from opportunity

identification and concept definition to partner selection, solution design, implementation planning and project management. The company works through **multidisciplinary ecosystems** linking industry, technology providers, integrators, research organisations, academia and public-sector stakeholders. Tejas continuously scouts **emerging technologies** and **develops partnerships** with international manufacturers and solution providers, with particular interest in critical infrastructure, digital transformation, cybersecurity, dual-use technologies and the transition to a green economy. As a **ROMATOM member, Tejas** aims to contribute **technology scouting, innovation development, partnership building and project-management capabilities** to Romania's nuclear and energy ecosystem.

DEVELOPMENT SERVICES

TEJAS DELIVERY LOGIC

We transform opportunities into structured projects and implementation success through a clear and proven approach.

SCOUT
Explore technologies, needs and opportunities.

STRUCTURE
Shape projects, partnerships and business models.

INTEGRATE
Enable ecosystem, resources and expertise.

DELIVER
Execute with focus, monitor and optimize.

WHAT YOU DISCOVER INSIDE THE TEJAS ECOSYSTEM

CAPABILITIES THAT TURN IDEAS INTO IMPACT

PERIMETER & ISR SECURITY
Secure, next-gen surveillance and situational awareness protection.

OT CYBER RESILIENCE
Secure industrial networks, critical systems and operational protection.

INDUSTRIAL & DUAL-USE
Industrialization, R&D platforms and dual-use product development.

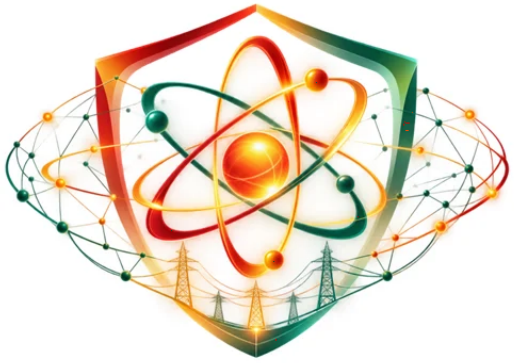

DIGITAL IDENTITY & ACCESS
Trusted digital identity, verification and secured access solutions.

SIMULATION & TRAINING
VR/AR simulation, mission training and operational readiness.

UNDERWATER OPERATIONS
Submarine and underwater diving systems and maritime solutions.

SECURE • RESILIENT • INNOVATIVE • FUTURE-READY

TEJAS DEVELOPMENT

10 Montreal Square, World Trade Center
011469 Bucharest, Romania

Main fields of activity

- Nuclear and critical-infrastructure technology development
- Physical protection and integrated security concepts
- Digital / IT&C / OT-cyber interfaces for energy assets
- Programme management and partner ecosystem orchestration
- R&D, innovation deployment and PoC-to-implementation support
- Technology scouting, solution integration and tender support

Company profile

- Romanian Smart Technology Hub for strategic, energy and nuclear-related projects
- Bridges nuclear/energy asset needs with security, digital, cyber and innovation capabilities
- Builds multidisciplinary ecosystems linking industry, technology providers, integrators, research, academia and public stakeholders
- Supports concept definition, partner selection, solution architecture and implementation planning

Founder track record

- 30+ years across electronics, automation, integrated security and critical infrastructure
- Direct leadership/coordination of complex physical-protection projects for nuclear facilities
- Senior executive background in security & defence projects for public, transport, energy and strategic clients
- Hands-on path from concept, specifications and tendering to commissioning, maintenance and partnerships

Tejas
DEVELOPMENT SERVICES

Nuclear relevant experience

• Cernavodă NPP: complex security / physical-protection systems and related project coordination
• Pitești Nuclear Fuel Plant: physical-protection system reference
• Nuclear industry: studies, consultancy and offers for security and fire-detection systems
• Technical domains: intrusion detection, CCTV, access control, fire alarm integration, weak currents, commissioning and maintenance
• Collaboration with design institutes, installation companies and international technology suppliers for critical-infrastructure projects

Key success factors

• Combines historical nuclear-sector references with current Tejas ecosystem model
• Understands procurement, design, implementation and operational lifecycle constraints
• Neutral integrator: connects industrial, research and technology partners
• Frames PoC/R&D topics into implementable, safety- and security-oriented projects
• Cross-domain perspective: energy, cyber/OT, defence, digital transformation and resilience
